

MATERIAL SAFETY DATA SHEET

ALOE VERA OIL EXTRACT

PRODUCT CODE SIN001

ISSUE DATE: 01/01/2025 REVISION DATE: 01/03/2025

In accordance with Regulation (EC) No 1907/2006 (REACH), Art. 31 and subsequent updates

SECTION 1: Identification of the substance/mixture and of the company/undertaking

| | |
|---------------------------|--|
| Trade Name | Aloe Vera Oil Extract |
| Synonyms | Aloe Vera Oil Extract |
| EC Number | - |
| CAS Number | Multiple CAS numbers (see Technical Data Sheet) |
| REACH Registration Number | - |
| Relevant Identified Uses | Ingredients for food, cosmetics, and nutraceuticals |
| Uses Advised Against | - |
| Manufacturer/Supplier | Sorelle Indústria e Comércio LTDA |
| Address | Av. 24 De Outubro, 1625 Entrada, Bom Retiro, SC, 88680-000 |
| Phone | - |
| Email | vendas@sorellebrasil.com |
| Emergency Number | 74 3532-2342 |

SECTION 2: Hazards identification

| | |
|--|---|
| Classification of the Substance or Mixture | No information. The mixture does not contain substances presenting a health or environmental hazard within the meaning of Regulation (EC) No 1272/2008. For the full text of Hazard- and EU Hazard statements, see SECTION 16. |
| Hazard Pictograms | No information. The mixture does not contain substances presenting a health or environmental hazard within the meaning of Regulation (EC) No 1272/2008. |
| Signal Word | No information. The mixture does not contain substances presenting a health or environmental hazard within the meaning of Regulation (EC) No 1272/2008. |
| Precautionary Statements | No information. The mixture does not contain |

substances presenting a health or environmental hazard within the meaning of Regulation (EC) No 1272/2008.

Adverse Physicochemical Effects

Information not available.

Adverse Human Health Effects and Symptoms

Information not available. When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). Any other hazard information applies to inadvertent misuse or accidents.

Adverse Environmental Effects

Information is not available. When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). Any other hazard information applies to inadvertent misuse or accidents.

Other Adverse Hazards

Based on the available data, the product does not contain PBT or vPvB substances in concentrations $\geq 0.1\%$.

Based on the available data, no substances have been identified as endocrine disruptors in accordance with Regulation (EU) 2017/2100 and Regulation (EU) 2018/605.

SECTION 3: Composition and information on ingredients

The product does not contain substances classified as hazardous to health or the environment under the provisions of Regulation (EU) 1272/2008 (CLP) (and subsequent amendments and adaptations) in quantities that would require declaration.

SECTION 4: First Aid Measures

General Notes

When contact with the product, use or handling, causes symptoms requiring prompt aid, follow the directives below for the specific exposure route.

Following Inhalation

In case of inhalation, the affected person should be moved into fresh air and kept still. If breathing is difficult, consult a doctor.

Following Skin Contact

Remove contaminated, saturated clothing immediately. Wash thoroughly the body (shower or bath). When in doubt or if symptoms are observed, get medical advice.

| | |
|------------------------------------|--|
| Following Eye Contact | Remove contact lenses. After contact with the eyes, rinse with water with the eyelids open for a sufficient length of time, then consult an ophthalmologist immediately. |
| Following Ingestion | If accidentally swallowed rinse the mouth with plenty of water (only if the person is conscious) and obtain immediate medical attention. Do not induce vomiting when the affected person is unconscious. |
| Self-Protection of the First Aider | No particular information. |
| Symptoms | See Section 11 (Toxicological information) |
| Effects | See Section 11 (Toxicological information) |
| Notes for the Doctor | Information is not available. |
| Special Treatment | Information is not available. |

SECTION 5: Firefighting Measures

| | |
|--------------------------------|---|
| Suitable Extinguishing Media | Carbon dioxide, foam, powder, water mist. |
| Unsuitable Extinguishing Media | No particular media. |
| Hazardous Combustion Products | However, avoid breathing combustion products. |
| Advice for Firefighters | Cool containers with water to avoid possible decomposition of the product and formation of potential hazardous substances. Wear full protection equipment available. When possible, collect extinguishing water and avoid contamination of surface water or drains. |
| Equipment for Firefighters | Standard firefighting gear, such as a self-contained open circuit compressed air breathing apparatus (EN 137), flame-resistant suit (EN 469), flame-resistant gloves (EN 659), and firefighter boots (HO A29 or A30). |

SECTION 6: Accidental Release Measures

| | |
|-----------------------------|---|
| For non-emergency personnel | Wear suitable protection equipment (see also Section 8 of the SDS) to avoid inhalation, contact with the skin and eyes and contamination of |

| | |
|----------------------------|---|
| For Emergency Responders | clothes. Wear suitable protection equipment (see also Section 8 of the SDS) to avoid inhalation, contact with the skin and eyes and contamination of clothes. |
| Environmental Precautions | Do not allow them to enter surface water or drains. Collect products with mechanical devices (if product is flammable use only antistatically equipped spark-free tools) and store in suitable containers for disposal. Check compatibility of the containers to collect product (see also Section 10 of the SDS). |
| For Containment | Use inert absorbent material (sand, vermiculite, diatomaceous earth, etc.) to soak up leaked product. Collect most of the remaining material and store it in suitable containers for disposal. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions of Section 13. |
| For Cleaning Up | No particular information |
| Other Information | Safe handling: see section 7 Disposal: see section 13 Personal protection equipment: see section 8 |
| Referenceto other sections | |

SECTION 7: Handling and Storage

| | |
|---|---|
| General protective measures | Handle products after consultation of all other sections of this SDS. Avoid product dispersion. When using it do not eat, drink, smoke, or sniff. Avoid improper contact with skin and eyes and inhalation. |
| Measures To Prevent Fire | If the product is flammable provide adequate earthing of containers, equipment, pumps and ventilation facilities. |
| Measures To Prevent Aerosol and Dust Generation | No particular information |

| | |
|--|---|
| Measures to Protect the Environment | Avoid product dispersion, keep containers well closed. |
| Advice On General Occupational Hygiene | When using it, do not eat, drink, smoke, or sniff. Remove clothes when contaminated. Wash hands before breaks and after work. |
| Technical Measures and Storage Conditions | Keep the product in clearly labeled containers. Store containers away from any incompatible materials, referring to Section 10 for details. |
| Packaging Materials | Store in original containers; replace the closing cap. If the product is moved to other containers, label them the same way as the original packages. |
| Requirements For Storage Rooms and Vessels | Store in tightly closed containers in a cool, dry, and well-ventilated place, away from incompatible materials (see Section 10), protected from light and heat. |
| Recommendations | No particular information |
| Industrial Sector Specific Solutions | No particular information |

SECTION 8: Exposure Controls/Personal Protection

| | |
|---|--|
| Exposure Control | Since the use of appropriate technical measures should always take priority over personal protective equipment, ensure good workplace ventilation through effective local exhaust. |
| Biological limit values | Information not available |
| Exposure limits at intended use | Information not available |
| DNEL/PNEC-values | Information not available |
| Risk management measures according to used control banding approach | It is recommended to use a P-type filtering face mask, with the class (1, 2, or 3) and actual necessity to be determined based on the results of the risk assessment (ref. EN 149 standard). |
| Environmental Exposure Controls | Emissions from production processes, including those from ventilation equipment, should be controlled to ensure compliance with |

Sorelle Indústria e Comércio LTDA

E-mail: vendas@sorellebrasil.com

environmental protection regulations.

Hand protection

Protect hands with Category III work gloves (ref. EN374 standard). When selecting the final glove material, consider compatibility, degradation, breakthrough time, and permeation. In the case of preparations, the resistance of work gloves to chemical agents must be tested before use, as is not always predictable. Gloves have a wear time that depends on duration and usage conditions.

Skin protection

Wear long-sleeved work clothing and Category I professional safety footwear (ref. Regulation 2016/425 and ENISO 20344 standard). Wash with water and soap after removing protective clothing.

Eye protection

It is recommended to wear sealed protective goggles (ref. EN 166 standard).

Respiratory protection

If the threshold limit value (e.g., TLV-TWA) of the substance or any of the substances in the product is exceeded, it is recommended to wear a mask with a type A filter, with the class (1, 2, or 3) chosen according to the usage concentration limit (ref. EN 14387 standard). If gases or vapors of different nature and/or gases or vapors with particles (aerosols, fumes, mists, etc.) are present, combined filters should be used. The use of respiratory protective equipment is necessary if the technical measures adopted are not sufficient to limit worker exposure to the considered threshold values. The protection provided by masks is still limited. If the substance is odorless or its odor threshold is higher than its TLV-TWA and in case of emergency, wear a self-contained open-circuit compressed air breathing apparatus (ref. EN 137 standard) or an external air supply respirator (ref. EN 138 standard). For the correct selection of respiratory protective equipment, refer to the EN529 standard.

SECTION9:Physical and Chemical Properties

Appearance

Clear to pale yellow oil

| Explosive properties | Not available |
| Oxidizing properties | Not available |

SECTION10:Stability and Reactivity

| | |
|------------------------------------|---|
| Reactivity | No reaction hazards with other chemicals at normal use and storage conditions. |
| Chemical Stability | The product is stable under normal use and storage conditions. |
| Possibility Of Hazardous Reactions | Under normal conditions of use and storage, hazardous reactions are not expected. |
| Conditions To Avoid | Avoid the formation of dust |
| Incompatible Materials | The product is stable under normal use and storage conditions. |
| Hazardous Decomposition Products | The product is stable under normal use and storage conditions. |

SECTION11:Toxicological Information

| | |
|----------------|---|
| Acute toxicity | Does not meet the classification criteria for this hazard |
|----------------|---|

| | |
|---|--|
| | class. |
| Skin corrosion/irritation | Does not meet the classification criteria for this hazard class. |
| Serious eye damage/irritation | Does not meet the classification criteria for this hazard class. |
| Respiratory or skin sensitization | Does not meet the classification criteria for this hazard class. |
| Germ cell mutagenicity | Does not meet the classification criteria for this hazard class. |
| Carcinogenicity | Does not meet the classification criteria for this hazard class. |
| Reproductive toxicity | Does not meet the classification criteria for this hazard class. |
| Summary of evaluation of the CMR properties | Does not meet the classification criteria for this hazard class. |
| STOT-single exposure | Does not meet the classification criteria for this hazard class. |
| STOT-repeated exposure | Does not meet the classification criteria for this hazard class. |
| Aspiration hazard | Does not meet the classification criteria for this hazard class. |
| Endocrine disrupting properties | Does not meet the classification criteria for this hazard class. |
| Other information | Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with effects on human health under evaluation. |

SECTION 12: Ecological Information

Use products following good working practice. Take measures to prevent the release of the substance or mixture to the environment, such as avoiding spills or keeping away from drains.

| | |
|------------------------------|---------------------------|
| Acute (short-term) toxicity | Information not available |
| Chronic (long-term) toxicity | Information not available |

| Abiotic degradation | Information not available |
| Physical-and photo-chemical elimination | Information not available |
| Biodegradation | Information not available |
| Partition coefficient n-octanol/water | Information not available |
| Bioconcentration factor (BCF) | Information not available |
| Known or predicted distribution to environmental compartments | Information not available |
| Surface tension | Information not available |
| Adsorption/Desorption | Information not available |
| Results of PBT and VPVB Assessment | Based on the available data, the product does not contain PBT or vPvB substances in a percentage \geq 0.1%. |
| Endocrine Disrupting Properties | Based on the available data, the product does not contain substances identified as endocrine disruptors in accordance with Regulation (EU) 2017/2100 and Regulation (EU) 2018/605 in concentrations \geq 0.1%. |
| Other Adverse Effects | Information not available |

SECTION 13: Disposal Considerations

| | |
|--------------------------------------|--|
| Product/Packaging disposal | Reuse when possible; neat cosmetic products residues are generally considered special non-hazardous waste. Disposal must be carried out by an authorized waste management company, in compliance with current national and local regulations. Contaminated packages must be delivered for reuse or disposal by an authorized waste management company. |
| Waste treatment-relevant information | Waste treatment must be generally performed by an authorized waste management company, in compliance with current national and local regulations. |

Sewage disposal-relevant information

Waste treatment must be generally performed by an authorized waste management company, in compliance with current national and local regulations.

Other disposal recommendations

No particular information

SECTION 14: Transport Information

This section of the safety data sheet shall provide basic classification information for the transport/shipment of substances or mixtures mentioned in Section 1 by road, rail, sea, inland waterways or air. Where such information is not available or relevant this shall be stated. Where relevant, this section shall provide information on the transport classification for each of the following international agreements which are transposing the UN Model Regulations for specific transport modes: the Agreement concerning the International Carriage of Dangerous Goods by Road (ADR), the Regulations concerning the International Carriage of Dangerous Goods by Rail (RID) and the European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways (ADN), all three of which have been implemented by Directive 2008/68/EC of the European Parliament and of the Council, as well as the International Maritime Dangerous Goods (IMDG) Code for the transport of packaged goods and the relevant IMO codes for the transport of bulk cargo by sea, and the Technical Instructions for the Safe Transport of Dangerous Goods by Air (ICAO).

| | US DOT | ADR | IMDG | ICAO |
